SUBJECT: APT #7367 (Ralph Squires Construction Co.)
Lot No. 6-F 13400 Andulusian Drive
Windrow Estates Subdivision 4-1-74

Soils on the lot are of the Cecil series. These soils have good drainage, good aeration and moderate permeability.

Based on this investigation, it is recommended that the lot be granted approval for installation of a septic tank system. Design should be based on a 60 min./in. perc. rate.

LOT PLAN

This is to certify that a percolation test has been carried out in accordance with tests made by the Mecklenburg County Health Department on the lot indicated above. The said test was conducted on that portion of the lot as indicated on above plot.

The percolation rate determined by the test was 60*min/in. The said lot is approved for the installation of an individual septic tank sewage treatment system with absorption trench absorption effluent discharge subject to the following terms and conditions:

1. A permit must be obtained before construction begins on the system from the Mecklenburg County Health Department. The Department must be notified 48 hours prior to the time when the proposed system on the said lot is ready for inspection.
2. The size of the septic tank and the treatment system which must be constructed is determined by the Health Department according to the information found on the percolation rate obtained above and on the size and type of building constructed thereon.
3. This approval is valid only at the site and for the conditions which existed at the time the percolation test was run.
4. This approval is void if any grading, construction, including the cutting, filling or soil compaction is performed on the lot which in the opinion of the Health Department renders the area where the percolation test was run unsuitable for the installation, construction, operation and/or repair of such a system.

This approval is granted based on the laws of the State of North Carolina and the rules and regulations of the North Carolina State Board of Health and the Mecklenburg County Board of Health which were in effect on the date of issuance and is void if at any time in the future, prior to the completion of the system, these laws, rules, and regulations are changed such that this approval would not have been granted had the new or revised laws, rule, and regulations been in effect on the issue date.

*Results determined by soil analysis.

The above specified lot is approved by the Mecklenburg County Health Department for the installation of an individual septic tank system with subsurface, soil absorption effluent discharge based on the percolation test results which yielded a percolation rate of 60 min/inch and on an on site inspection of the said lot, and upon the information supplied in the "Application for an Installation Construction, Alteration and/or Repair Permit", number 7367. This approval is subject to the following terms and conditions

1. That the nitrification field be installed, constructed, altered, and/or repaired in the same area where the percolation test was run
2. That an "Installation Construction, Alteration, and/or Repair Permit" be issued and in full force and effect when the system is installed, constructed, altred, and/or repaired and that the system be installed in accordance with same

This approval may be revoked and the building inspection department requested to revoke any building permit(s) which have been issued to authorize construction on the said lot if at any time it is determined that any information contained in the "Application for an Installation, Construction, Alteration, and or Repair Permit" is not correct or is untrue or that the septic tank system is not being installed, constructed, altered and/or repaired in accordance with a valid Installation, Construction Alteration, and/or Repair Permit

Environmentalist

SUBJECT: APT #7467 (Yandle's Truck Refrigeration, Inc.)
I-85 near Derita Road
2-11-74

Soils were found to be cut and fill material over the majority of the property. This material is composed of highly compacted clayey soil. The material has very little porosity or natural structural development. These factors result in inadequately slow permeability and percolation rate.

A small area of practically undisturbed soils was located on the Southeast corner (right front corner - adjacent to access road) of the property. These soils have good drainage, good aeration and moderate permeability.

Based on this investigation, it is recommended that the lot be granted conditional approval for installation of a septic tank system. The system must be located in the area of suitable soils as indicated on the "Percolation Test Report". Design should be based on a 60 min./in. perc. rate.

PLOT PLAN

This is to certify that a percolation test has been run and on on site inspection made by the Mecklenburg County Health Department on the lot described above. The said test was conducted on that portion of the lot as indicated on above plot

The percolation rate determined by the test was 60 min/in The said lot is approved for the installation of an individual septic tank wastewater treatment system with subsurface, soil absorption effluent discharge subject to the following terms and conditions

1. A permit to install, construct, alter, or repair the specific system shall be obtained from the Mecklenburg County Health Department prior to the beginning of any construction of buildings on of the wastewater treatment system on the said lot
2. The size of the septic tank wastewater treatment system which must be installed will be determined by the Health Department prior to installation based on the percolation rate obtained above, and on the size and type of building constructed thereon
3. This approval is valid only if the system is installed in the immediate area where the percolation test was run
4. This approval is void if any grading, filling, or construction (including the drilling of a well) is performed on the lot which, in the opinion of the Health Department, renders the area where the percolation test was run unsuitable for the installation, construction, alteration, and/or repair of such a system

This approval is granted based on the laws of the State of North Carolina and the rules and regulations of the North Carolina State Board of Health and the Mecklenburg County Board of Health which were in effect on the date of issuance and is void if at any time in the future, prior to the completion of the system, these laws, rules, and regulations are changed such that this approval would not have been granted had the new or revised laws, rules, and regulations been in effect on the issue date.
