PLOT PLAN

This is to certify that a soil investigation and percolation test was made by the Mecklenburg County Department of Environmental Health on the lot described above. The soil investigation was conducted on that portion of the lot as indicated on the above plot plan.

Provisionally Suitable

The permeability rate determined by the percolation test was _____. The said lot is approved for the installation of an individual sewage treatment system with subsurface, soil absorption effluent discharge subject to the following terms and conditions:

1. The sewage treatment system shall be installed in accordance with the Mecklenburg County Department of Environmental Health regulations governing the design and construction of wastewater treatment systems.
2. The bottom of the soil absorption field shall be at least _____ inches above the seasonal high water table as determined by the Mecklenburg County Department of Environmental Health and at least _____ inches above rock.
3. The soil absorption field shall be located on the lot in the acceptable soil as indicated on the plot plan.
4. The approval is based on soil profile descriptions and percolation tests performed on the lot which is the property of the Mecklenburg County Department of Environmental Health and the area indicated as acceptable for the system installation. Any alteration of the lot that changes the soil profile may void the approval of the lot with a system.

This approval is granted based on the laws of the State of North Carolina and the rules and regulations of the North Carolina Department of Human Resources Division of Health Services and the Mecklenburg County Health Commission which were in effect on the date of issuance and is void if at any time in the future, prior to completion of the system, these laws, rules and regulations are changed such that this approval would not have been granted had the newly revised laws, rules, and regulations been in effect on the issue date.
