PLOT PLAN

This is to certify that a soil investigation and on-site investigation was made by the Mecklenburg County Department of Environmental Health on the lot described above. The said investigation was conducted on that portion of the lot as indicated on the above plot. The permeability rate determined by the investigation was **Provisionally Suitable**. The said lot is approved for the installation of an individual septic tank wastewater treatment system with subsurface soil absorption of sanitary sewage subject to the following terms and conditions:

1. Approval must be obtained from the Mecklenburg County Department of Environmental Health prior to the issuance of a construction permit for the wastewater treatment system to be installed.
2. The size of the septic tank and wastewater treatment system absorption area shall be determined by the Mecklenburg County Department of Environmental Health at the time of application for permit in accordance with the permeability rate obtained above and on the basis of the number of bedrooms in the dwelling to be served thereby.
3. This approval is valid only for the system as installed on the immediate area indicated as acceptable for system installation on the above plot.
4. This approval is void if any grading, filling or other construction activity affecting the soil characteristics of the area indicated as acceptable for system installation is performed on the lot which in the opinion of the Mecklenburg County Department of Environmental Health renders the area indicated as acceptable for system installation unsuitable for installation. Construction of a new system and/or repair of such a system.

This approval is granted based on the laws of the State of North Carolina and the rules and regulations of the North Carolina Department of Human Resources, Division of Health Services and the Mecklenburg County Health Commission which were in effect on the date of issuance and is void if at any time in the future, prior to completion of the system, these laws, rules and regulations are changed such that this approval would not have been granted had the new or revised laws, rules, and regulations been in effect on the issue date.
