PLOT PLAN

This is to certify that a percolation test has been run and an on-site inspection made by the Mecklenburg County Health Department on the lot described above. The said test was conducted on that portion of the lot as indicated on above plot.

The percolation rate determined by the test was 56 min/in. The said lot is approved for the installation of an individual septic tank wastewater treatment system with subsurface, soil absorption effluent discharge subject to the following terms and conditions:

1. A permit to install, construct, alter, or repair the specific system shall be obtained from the Mecklenburg County Health Department prior to the beginning of any construction of buildings, or of the wastewater treatment system on the said lot.
2. The size of the septic tank wastewater treatment system which must be installed will be determined by the Health Department prior to installation based on the percolation rate obtained above and on the size and type of building constructed thereon.
3. This approval is void unless the system is installed in the immediate area where the percolation test was run.
4. This approval is void if any grading, filling, or construction including the removal of soil is performed on the lot which, in the opinion of the Health Department, renders the area where the percolation test was run unsuitable for the installation, construction, alteration, and/or repair of such a system.

This approval is granted based on the laws of the State of North Carolina and the rules and regulations of the North Carolina State Board of Health and the Mecklenburg County Board of Health which were in effect on the date of issuance and is void if at any time in the future prior to the completion of the system, these laws, rules, and regulations are changed such that this approval would not have been granted had the new or revised laws, rules, and regulations been in effect on the issue date.

MAP BOOK NO 17 PAGE NO 81

This site certified as approved by the Mecklenburg County Health Department for the installation of an individual septic tank system with subsurface soil absorption effluent discharge based on the percolation test results and provided a percolation rate of 56 min/in or on-site inspection of the said site and the information supplied in the "Application for an Installation, Construction, Alteration and/or Repair Permit" number 5581. This approval is subject to the following terms and conditions:

1. That the absorption field be installed, constructed, altered and/or repaired in the same area where the percolation test was run.
2. That an "Installation, Construction, Alteration and/or Repair Permit" be issued and in full force and effect when the system is installed, constructed, altered and/or repaired and that the system be installed in accordance with same.

This approval may be revoked and the building inspection department requested to revoke any building permit which has been issued to authorize construction on the said lot if at any time it is determined that any material misstatement appears in the "Application for an Installation, Construction, Alteration, and/or Repair Permit" or that the septic tank system is not being installed, constructed, altered and/or repaired in accordance with a valid "Installation, Construction, Alteration and/or Repair Permit".

## INSTALLATION, CONSTRUCTION, ALTERATION, AND OR REPAIR PERMIT

**(Individual Septic Tank System with Subsurface, Soil Absorption, Effluent Discharge)**

Permission is hereby given to Install or Construct Alter or Repair the individual septic tank wastewater treatment system with subsurface soil absorption effluent discharge as specified herein at the described location. This permit is granted based upon the information supplied in application 5551 dated 4-26-73 and this permit shall be void and of no effect if the information provided in the application is not true and correct. All work shall be completed on or before 9-9-73 after which date this permit shall be null and void.

PLOT OF SYSTEM

Percolation Rate 60

Liquid Capacity of Tank 1500 gal.

Tank Construction Concrete

Absorption and/or Nitrification Lines

Total Line Length 795'

Number of Lines 6

Distance from House 10'

Distance from Property Line 10'

Distance from Well NA

NAME OF OWNER Bob McLean + 6

LOCATION OF PROPERTY 5941 Rainey Rd

The system shall meet all of the construction requirements as set forth in the Regulations of the Mecklenburg County Board of Health which are in effect on the date of the granting of this permit. A certificate of approval must be issued by the Health Director before any system can be covered up or otherwise rendered uninspectable or can be used.
