SUBDIVISION Providence Plantation LOT NO 29 BLOCK NO. C

PLOT PLAN

This is to certify that a soil investigation and on site investigation was made by the Mecklenburg County Department of Environmental Health on the lot described above. The said investigation was conducted on that portion of the lot as indicated on the above plot. The permeability rate determined by the investigation was **Provisionally Suitable**. The said lot is approved for the installation of an individual septic tank wastewater treatment system with subsurface, soil absorption effluent discharge subject to the following terms and conditions:

1. A permit to install the proposed system will be issued from the Mecklenburg County Department of Environmental Health prior to the application for building; and the wastewater treatment system on the said lot.
2. The size of the septic tank, wastewater treatment system or device to be installed will be determined by the Mecklenburg County Department of Environmental Health pursuant to the indicated rate of the permeability rate obtained above, and on the size and type of building constructed thereon.
3. This approval applies only to the system location on the immediate area indicated as acceptable for system installation on the above plot.
4. This approval is void if any grading, fill, or other construction activity affecting the soiling of a well is performed on the lot which, in the opinion of the Mecklenburg County Department of Environmental Health renders the area indicated as acceptable for system installation unacceptable for installation, construction, use, and repair of such system.

This approval is granted based on the laws of the State of North Carolina and the rules and regulations of the North Carolina Department of Human Resources, Division of Health Services and the Mecklenburg County Health Commission which were in effect on the date of issuance and is void if at any time in the future, prior to completion of the system, these laws, rules and regulations are changed such that this approval would not have been granted had the new or revised laws, rules, and regulations been in effect on the issue date.
