TO: Randy Reynolds, Environmentalist

FROM: W. Everette Lynn, Jr. W. E. L.
Soil Scientist

SUBJECT: Soil investigation on Lot No. 2, C.R. 3115, APT - 6670

A soil investigation was made on Lot No. 2, C.R. 3115, on July 23, 1973, to determine site suitability for a septic tank system. The soils were found to be of the Helena series and alluvial soils with a seasonal high water table. The Helena soils occur on the front of the lot (adjacent to C.R. 3115). These soils have plastic clay minerals. This results in slow perc and a perched high water table. The alluvial soils on the rear of the lot also have a high water table.

Based on these investigations, it is recommended that the lot be disapproved for installation of a septic tank system.
