SUBJECT: APT #7308 (J. T. Trull)
Lot No. 1, 2, 3 and 4, Stumptown Road
3-4-74

Soils were found to be of the Iredell and Enon series. These soils have plastic and sticky clay subsoils which contain swelling clay minerals. In addition, the Iredell soils may have a perched high water table during periods of high rainfall. These soil characteristics result in inadequately slow percolation rate and permeability.

Based on this investigation, the lot appears unsuitable for installation of a septic tank system.
