PLOT PLAN

This is to certify that a soil investigation and on-site investigation was made by the Mecklenburg County Department of Environmental Health on the lot described above. The said investigation was conducted on that portion of the lot as indicated on the above plot. PROVISIONALLY SUITABLE The said lot is approved The permeability rate determined by the investigation was for the installation of an individual septic tank wastewater treatment system with subsurface soil absorption effluent discharge subject to the following terms and conditions

1. A permit application to repair the system to be issued to the Mecklenburg County Department of Environmental Health upon the following terms and conditions of the wastewater treatment system
2. The size of the septic tank and absorption area must be based on the permeability rate obtained above and on the Mecklenburg County Department of Environmental Health regulations there in the size and type of the dwelling constructed in the area shall be acceptable for system installation on the above plot
3. This approval is void if any alterations are performed on the site which change the conditions under which this approval was granted
4. This approval is void if any alterations are performed on the site which change the conditions under which this approval was granted. Only the area indicated as acceptable for the system installation shall be used for the installation of such a system

This approval is granted based on the laws of the State of North Carolina and the rules and regulations of the North Carolina Department of Human Resources Division of Health Services and the Mecklenburg County Health Commission which were in effect on the date of issuance and is void if at any time in the future, prior to completion of the system these laws rules and regulations are changed such that this approval would not have been granted had the new revised laws, rules, and regulations been in effect on the issue date
