PLOT PLAN

This is a certified, technical investigation report. A site investigation was made by the Mecklenburg County Department of Environmental Health on the lot described above. The said investigation was conducted on that portion of the lot as indicated on the above plot. PROVISIONALLY

The permeability rate determined by the investigation was SUITABLE. The said lot is approved for the installation of an individual septic tank wastewater treatment system with subsurface, soil absorption effluent discharge subject to the following terms and conditions:

1. A permit must be obtained prior to repair of the proposed system from the Mecklenburg County Department of Environmental Health prior to the beginning of construction of the wastewater treatment system on the lot.
2. The size of the septic tank wastewater treatment system which may be installed will be determined by the Mecklenburg County Department of Environmental Health according to the provisions of the permeability rate obtained above, and on the proposed number of bedrooms in the dwelling.
3. The septic tank system must be located on the lot as indicated on the approved system installation on the above plot.
4. The approval of the septic tank system is contingent upon the system being installed in the same zone on the lot which, in the opinion of the Mecklenburg County Department of Environmental Health, most nearly resembles the zone indicated as acceptable for system installation on the above plot.

This approval is granted by virtue of the Law, General Statutes of North Carolina, and the rules and regulations of the North Carolina Department of Human Resources, Division of Health Services, and the Mecklenburg County Board of Health in effect on the date of issuance and is void if at any time in the future prior to completion of the system, these laws, rules, and regulations are changed such that this approval would not have been granted had the new or revised laws, rules, and regulations been in effect on the issue date.
