Notice of Well Variance

Mecklenburg County Groundwater & Wastewater Services has reviewed information submitted by Michael and Brenda Peters for the well located at 17313 Crosshaven Drive, Charlotte, NC. Mr. and Mrs. Peters are seeking a variance from Chapter II, Section IV (A) 4 which requires additions to maintain a minimum separation distance of 25 feet between building foundations and existing water supply wells. The requested separation distance is fifteen feet.

The 25 foot separation required between a well and an addition is consistent with the separation requirements for new well construction. The requirements are necessary to protect public health. Wells located less than 25 feet from a building foundation have an increased susceptibility to contamination.

The variance is approved with the following conditions:

The water supply well shall be tested prior to construction and annually thereafter. The sample will be collected by the Mecklenburg County Groundwater and Wastewater Services and analyzed for the following parameters:

bacteria, pH, hardness, lead, arsenic, iron, manganese, copper, zinc, calcium, magnesium, alkalinity, chloride, fluoride, silver, acidity, barium, cadmium mercury, manganese, sodium selenium total dissolved solids and nitrates/nitrites.

The cost for sample collection and analysis is the responsibility of the property owner and will be paid to GWS prior to construction and between January 1 and January 31 of each year thereafter. The cost as of August 29, 2007 is $65.00. The annual cost of the sample collection and analysis may change but will be the current cost available to the public through the Mecklenburg County Health Department at the time of sampling.

If the water from the water supply well is determined to contain a contaminant(s) the water must be treated to remove the contaminant(s) of concern, such that the water would be considered potable, for as long as the raw water contains the contaminant of concern. Otherwise the well will be permanently abandoned.

If the water supply well is determined to contain a contaminant above the Mecklenburg County Groundwater Quality Standards Chapter V, Mecklenburg County will notify the North Carolina Department of Natural Resources (NCDENR) of the groundwater quality violation.

The variance conditions must be disclosed to any and all prospective buyers of the property and the requirements will carry over with the sale of the property.

The Notice must be notarized and recorded with the register of deeds prior to construction.

Should I Have My Water Tested?

WATER IS ESSENTIAL FOR LIFE

Doctors recommend that we drink at least 8 glasses of water a day. That's about 4 gallons a week or 200 gallons a year. Many of us take our water for granted and never consider testing it to be sure it is safe. It may be that some of us are afraid to have our water tested because we are not sure of what may be found. Fortunately, many problems that can occur with private wells and drinking water have solutions.

WELL CONSTRUCTION IS IMPORTANT IN PROTECTING YOUR DRINKING WATER

As of January 1st 2005 Mecklenburg County now has a Groundwater Well Regulation that includes the inspection of private wells. This means that **BEFORE** you have a new well drilled, a permit application needs to be submitted and approved by our department to ensure that your well construction meets specified standards and that the water is safe for you and your family. In addition, certain repair work to existing wells requires a permit. Only a North Carolina Certified Well Contractor can legally install or repair wells in Mecklenburg County.

WHEN SHOULD I TEST MY WATER?

GWS recommends private well owners test their water for bacterial contamination every year. In addition, the water can be tested for a variety of inorganic, mineral and toxic metals, pesticides and volatile and semi-volatile organic chemicals. If you notice any change in your water, it should be tested. GWS also recommends you have your water tested after any repair work is done to a well. A new well will be tested as part of the inspection and the cost is included in the permit fees. If you haven't had your water tested in the past year, ***NOW*** is a good time to test your well water.

PUBLIC WATER? SHOULD I TEST THE WATER?

If you drink water from a community or municipal water source, your water is tested on a regular basis. Generally, public water suppliers do not take water samples from individual residences. There is a chance that lead and other metals from the plumbing in the house can end up in your water. Public water suppliers are not responsible for testing the water from inside your home, therefore a periodic baseline sample from your home is recommended.

THE MECKLENBURG COUNTY GROUNDWATER & WASTEWATER SERVICES (GWS) OFFERS:

⇒ The Information and results are unbiased and accurate!
⇒ Collection of the samples from your home and delivery to a state certified laboratory that will conduct the analyses
⇒ More than 40 types of water tests are available
⇒ Health risk assessments & consultation if any problems are found
⇒ No sales pressure! PUBLIC HEALTH is our business!

COPY

Dear Mr. and Mrs. Peters:

Mecklenburg County Groundwater & Wastewater Services (GWS) has reviewed information submitted by you seeking a variance to construction standards for water supply wells. Specifically, you are seeking a variance from Chapter II, Section IV (A) 4 which states:

> "Separation distances as required in Section IV (A) 2 or Section IV (A) 3 of this Chapter apply to all additions. Additions of a type not covered by Section IV (A) 2 or Section IV (A) 3 of this Chapter shall be located the maximum distance possible from any existing water supply well but shall in no case be less than 25 feet."

Based on the information you submitted and a site review conducted by GWS, the requested separation distance is fifteen feet.

Based on this information the variance will be approved with the following conditions:

The water supply well shall be tested prior to construction of the encroaching addition and annually thereafter. The sample will be collected by GWS and analyzed for the following parameters:

> bacteria, pH, hardness, lead, arsenic, iron, manganese, copper, zinc, calcium, magnesium, alkalinity, chloride, fluoride, nitrates/nitrites, pesticides, volatile organic compounds and semi-volatile organic compounds.

The cost for sample collection and analysis is the responsibility of the property owner and will be paid to GWS prior to construction and between January 1 and January 31 of each year thereafter. The cost as of August 23, 2007 is $265.00. The annual cost of the sample collection and analysis may change but will be the current cost available to the public through the Mecklenburg County Health Department at the time of sampling.

If the water from the water supply well is determined to contain a contaminant(s) the water must be treated to remove the contaminant(s) of concern, such that the water would be considered potable, for as long as the raw water contains the contaminant-of-concern. Otherwise the well shall be permanently abandoned.

If the water supply well is determined to contain a contaminant above the Mecklenburg County Groundwater Well Regulations, Chapter V, Groundwater Quality Standards, GWS will notify the North Carolina Department of Natural Resources (NCDENR) of the groundwater quality violation.

The variance conditions must be disclosed to any prospective buyers of the property.

The attached Notice of Well Variance must be notarized and recorded with the register of deeds prior to construction. A copy of the recorded Notice must be provided to GWS.

Please do not hesitate to contact me at 704-336-5438 if you have any questions.

Sincerely,

Should I Have My Water Tested?

74369

WATER IS ESSENTIAL FOR LIFE

Doctors recommend that we drink at least 8 glasses of water a day. That's about 4 gallons a week or 200 gallons a year. Many of us take our water for granted and never consider testing it to be sure it is safe. It may be that some of us are afraid to have our water tested because we are not sure of what may be found. Fortunately, many problems that can occur with private wells and drinking water have solutions.

WELL CONSTRUCTION IS IMPORTANT IN PROTECTING YOUR DRINKING WATER

As of January 1st 2005 Mecklenburg County now has a Groundwater Well Regulation that includes the inspection of private wells. This means that **BEFORE** you have a new well drilled, a permit application needs to be submitted and approved by our department to ensure that your well construction meets specified standards and that the water is safe for you and your family. In addition, certain repair work to existing wells requires a permit. Only a North Carolina Certified Well Contractor can legally install or repair wells in Mecklenburg County.

WHEN SHOULD I TEST MY WATER?

GWS recommends private well owners test their water for bacterial contamination every year. In addition, the water can be tested for a variety of inorganic, mineral and toxic metals, pesticides and volatile and semi-volatile organic chemicals. If you notice any change in your water, it should be tested. GWS also recommends you have your water tested after any repair work is done to a well. A new well will be tested as part of the inspection and the cost is included in the permit fees. If you haven't had your water tested in the past year, ***NOW*** is a good time to test your well water.

PUBLIC WATER? SHOULD I TEST THE WATER?

If you drink water from a community or municipal water source, your water is tested on a regular basis. Generally, public water suppliers do not take water samples from individual residences. There is a chance that lead and other metals from the plumbing in the house can end up in your water. Public water suppliers are not responsible for testing the water from inside your home, therefore a periodic baseline sample from your home is recommended.

THE MECKLENBURG COUNTY GROUNDWATER & WASTEWATER SERVICES (GWS) OFFERS:

⇒ The Information and results are unbiased and accurate!
⇒ Collection of the samples from your home and delivery to a state certified laboratory that will conduct the analyses
⇒ More than 40 types of water tests are available
⇒ Health risk assessments & consultation if any problems are found
⇒ No sales pressure! PUBLIC HEALTH is our business!

ID# 10 334

APPLICATION FOR TESTING YOUR WATER

Name Brenda & Mike Pellens

Daytime Phone 704/488-1431 // 7041309-9589

Site Address 17313 Crosshaven Dr CLT NC 28278
