## INTER-OFFICE COMMUNICATION

DATE: November 12, 1991

TO: Ms. Sylvia D. Daniel, Program Chief
Mecklenburg County Health Department
Environmental Health Section
Attn: Judy Kiser

FROM: Dennis D. Gwaltney, P.E.
Public Service Engineer

SUBJECT: Request for City Sewer Service.

We have a request from Bobby G. Haynes to construct an extension of sewer main to serve 186 Kingsway Circle. Limited funds have been appropriated for water and sewer street main extensions in unserved areas inside the City. One of the requirements of this program is evidence of a public health need, prior to any extension.

Please indicate below if a Public Health Need is evident at this location according to the following criteria.

__✓__ Evidence of a Public Health need that, in the opinion of the Environmental Health Department, cannot be eliminated with repairs to the existing system.

____ Evidence of a Public Health Need that, in the opinion of the Environmental Health Department, can be eliminated with repairs to the existing system.

Re: Investigation of potential repair site for septic tank system located at 186 Kingsway Circle. File No. 7677A

A soils investigation of the potential repair site for the malfunctioning septic tank system located at 186 Kingsway Circle, Charlotte, North Carolina, was made on August 15, 1991. The soils have expanding clay minerals present that swell upon becoming wet, reducing soil pore space and internal soil water movement. Depth to saprolite ranges from approximately 24 to 36 (twenty four to thirty six) inches. Indications of seasonal perched water were noted at a depth of approximately 24 (twenty-four) inches. slopes range to approximately 6 (six) percent.

The area of soils investigated is classified as unsuitable for septic tank system installation as per the rules for sewage collection and disposal as found in sections 1900 of the North Carolina Administrative code. A sketch of the site is attached.
