Re: Property located at 5201 Fowler Farm Road, TC #PO 135-391-99

Dear Sir:

At your request a soils investigation was conducted on the property designated above. Results of this investigation, showed the site to be classified unsuitable for the installation of a ground absorption sewage disposal system. A copy of the site evaluation report is enclosed for your information.

North Carolina General Statute 130A-335 and 10 NCAC 10A .1948 (c) provides that:

> Sites originally classified as UNSUITABLE may be used for soil absorption disposal systems, provided engineering, hydrogeologic, and soil studies indicate to the local health department that a suitable septic tank system or a suitable alternate system can reasonably be expected to function satisfactorily. Such sites may be reclassified as PROVISIONALLY SUITABLE upon submission to the local health department and when requested by the local health department to the state agency of the following:
>
> (1) Adequate substantiating data to indicate that a ground absorption system can be installed so that the effluent will receive adequate treatment;
>
> (2) Adequate substantiating data to indicate that the effluent will not contaminate any drinking water supply, ground water used for drinking water, or any surface water;
>
> (3) Adequate substantiating data to indicate that the effluent will not be exposed on the ground surface or be discharged to surface waters where it could come in contact with people, animals, or vectors.

Upon receipt of a request for reclassification as provided for above, the submission of plans and specifications for an applicable sewerage treatment system, and the approval of such system as submitted, the department will issue the appropriate permits.

If I may be of any assistance, please feel free to call.

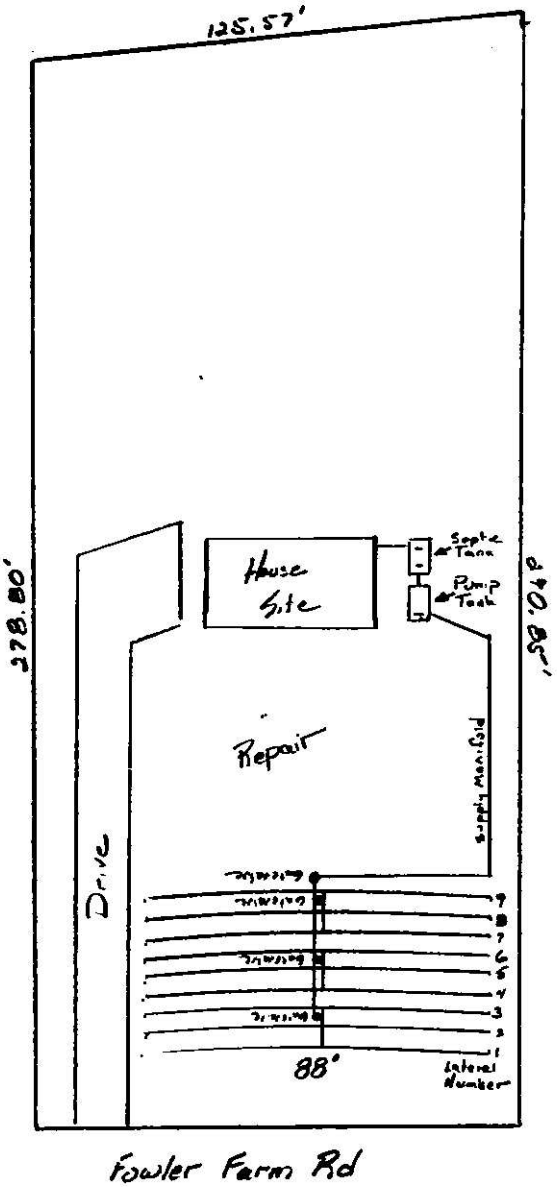

Sincerely,

Bill D. Hardister, Jr.
Environmental Health Supervisor

LPP System Design Specifications

Daily waste flow 480 gal
Septic tank size 1500 gal
Pumping tank size 1000 gal
Effluent loading rate .12
Absorption area 4005 ft²
Total lateral length 800 ft
Lateral diameter 1¼ in PVC sch 160
Lateral Configuration 89 ft x 45 ft
Supply line length 125 ft
Supply line diameter 2 in PVC sch 40
Manifold placement center
Check valve required? No

Total flow 48 gal
Elevation head 16 ft
Friction head 5.7 ft
Pressure head 2 ft
Total head 23.67 ft
Pump requirements 48 gal at 23.7 ft
Lateral storage volume 72 gal
Supply line storage volume 11.29 gal
Total storage volume 83.25 gal
Dosing volume 360 gal
Dosing depth 18 inches
