Patricia A. Menges
11317 Alexanderana Road
Huntersville, NC 28078

Dear Ms. Menges:

Enclosed you will find a copy of the report by Joe Lynn, Regional Soil Specialist, for the property evaluated on Alexanderana Road. Mr. Lynn has been covering this area of the state and another area for most of the year and has not been able to spend time in his office.

Please contact me if you have any questions regarding this report.

Sincerely,

William R. Marlin
Licensed Soil Scientist

Dear Mr. Menges:

Enclosed you will find a copy of the report ~~by~~ by Joe Lyon, ~~Regional~~ Regional Soil Specialist, for the property evaluation on Alexanderana Road. Mr. Lyon has been covering this area of the state and another area for most of the year and has been unable to spend time in his office. Please contact me if you have any questions regarding the report.

Sincerely,

William A. Marks

Watershed Coordinator

SOIL AND SITE REPORT FOR A GROUND ABSORPTION WASTEWATER SYSTEM FOR MAX ALEXANDER

by

JOE LYNN, REGIONAL SOIL SPECIALIST
ON-SITE WASTEWATER SECTION
DIVISION OF ENVIRONMENTAL HEALTH

Submitted to:

BILL MARLIN, SOIL SCIENTIST
MECKLENBURG COUNTY HEALTH DEPARTMENT

OCTOBER 6, 1997

SUMMARY

This site is UNSUITABLE for a ground absorption wastewater treatment and disposal system under current laws and rules 15A NCAC 18A .1900. No ground absorption wastewater (septic tank) system can be permitted on this site.

This report gives a brief summary of the findings, conclusions, and recommendations.

If you have any questions or I can be of assistance, contact me at (704) 397-5152.

INTRODUCTION

COUNTY: Mecklenburg

OWNER/APPLICANT : Mac Alexander

LOCATION: Alexanderana Rd.

TYPE OF FACILITY: Residence

DESIGN UNIT: 360 gpd

PROPOSED WATER SUPPLY: On-site well

EVALUATED BY: Joe Lynn assisted by Bill Marlin using auger borings

DATE OF EVALUATION: January 2, 1997

OTHERS PRESENT: Mr. Alexander

SITE INFORMATION

AREA/PRESENT USE: 4.36 acres / field and woods

TOPOGRAPHY: 3 to 10 percent slope

LANDSCAPE POSITION: Linear, foot, and nose slopes

SITE LIMITATIONS: Stream, gullies, terraces, old home site

SOIL INFORMATION

SOIL TEXTURE: (surface) Sandy loam, little sandy clay loam
(subsurface) Sandy clay

SOIL STRUCTURE: Blocky

CLAY MINERALOGY: 3 to 29 inches to expansive clay mineralogy

SOIL DEPTH: 22 to 36 inches to saprolite, rock, or parent material

SAPROLITE: 22 to 36 inches to unsuitable saprolite

SOIL WETNESS: 16 to 28 inches to chromas of two or less Munsell Color Book

RESTRICTIVE HORIZONS: None

AREA OF SUITABLE or PROVISIONALLY SUITABLE SOIL: None

CONCLUSIONS

This site is Unsuitable for the installation of a conventional ground absorption wastewater system (septic tank) due to:

1. Unsuitable Topography and Landscape Position — Section .1940
   Drainage features (gullies)
2. Unsuitable Soil Characteristics — Section .1941
   Expansive mineralogy
3. Unsuitable Soil Wetness Conditions — Section .1942
   Chromas of 2 or less
4. Insufficient Soil Depth — Section .1943
   Soil Depths to less than 36 inches
3. Insufficient Available Space — Section .1945
   Not enough area for an initial wastewater system and a repair if needed.

The site is Unsuitable under Rule .1956 Modifications to Septic Tank Systems:

1. Shallow conventional systems — NO
2. Large Diameter Pipe systems — NO
3. Prefabricated Porous Block Panel systems — NO
4. Drainage will not be sufficient to reclassify the site to provisionally suitable.
5. The saprolite is unsuitable by this rule, too much clay content.

The site is Unsuitable under Rule .1957 Alternative Sewage Systems:

1. Low Pressure Pipe systems — NO
2. Fill systems — NO
3. Aerobic Treatment systems — NO

The site is Unsuitable under Rule .1969 Experimental and Innovative Systems, Components, or Devices:

1. Chamber systems	NO
2. Houck Drainage systems	NO
3. Perc-Rite Subsurface Drip system	NO
4. Sand Filter Pretreatment systems	NO

RECOMMENDATIONS

The owner has the following options that might allow the use of this property as desired:

1. The applicant may purchase other Suitable or Provisionally Suitable property to place the ground absorption wastewater system on.
2. The applicant may obtain an easement on a Suitable or Provisionally Suitable property to place the ground absorption wastewater system on.
3. The Division of Water Quality in Mooresville, N. C. at (704) 663-1699 may be contacted to pursue options available through that office. The applicant should contact someone with a knowledge of discharge systems to evaluate the site before contacting this office.
4. A wastewater system can be pursued under Rule 1948 (d). Written documentation must be submitted to your office showing that the proposed wastewater system can be expected to function properly. The data must contain the following:
   A. The effluent must be non-pathogenic, non-infectious, non-toxic, and non-hazardous.
   B. The ground water and the surface water must not be contaminated by the effluent.
   C. The effluent must not be exposed to the ground surface or discharged to surface waters where it could come into contact with people, animals, or vectors.

Re: Alexanderana Road
File: 1557B
Parcel: 017-042-09

Dear Ms. Menges:

Receipt of your Application for Improvement Permit for the above referenced property is acknowledged. A soil evaluation and a site visit have been conducted. The results of the evaluation indicated that the site is **UNSUITABLE** under Rules .1941 **SOIL CHARACTERISTICS (MORPHOLOGY)**, .1942 **SOIL WETNESS CONDITIONS**, .1943 **SOIL DEPTH** and .1945 **AVAILABLE SPACE**. For these reasons your Application for Improvement Permit is denied. A possible way to develop the site exists under Rule .1948(d) which reads as follows:

> A site classified as **UNSUITABLE** may be used for a ground absorption sewage treatment and disposal system specifically identified in Rules .1955, .1956, or .1957 of this Section or a system approved under Rule .1969 if written documentation, including engineering, hydrogeologic, geologic or soil studies, indicates to the local health department that the proposed system can be expected to function satisfactorily. Such sites shall be reclassified as **PROVISIONALLY SUITABLE** if the local health department determines that the substantiating data indicate that:
> (1) a ground absorption system can be installed so that the effluent will be non-pathogenic, non-infectious, non-toxic, and non-hazardous;
> (2) the effluent will not contaminate ground or surface water; and
> (3) the effluent will not be exposed on the ground surface or be discharged to surface waters where it could come in contact with people, animals, or vectors.

The State shall review the substantiating data if requested by the local health department.

Please be advised that you have the right to an informal review by this department. You also have the right to appeal under G.S. 130A-24, and to have the appeal held in Mecklenburg County.

If you have any questions regarding this matter, please call me at 336-5575.

Sincerely,

Kelly Randall, R.S., Soil Scientist
Individual Water and Wastewater Systems
