RE: Property located at Lawyers Road (S.I.R. No. 21360; PO 195-051-11)

Gentlemen:

At your request, a field investigation was conducted on the property designated above. The soils on the property were found to contain a limited area of provisionally suitable soil for the installation of a ground absorption sewage disposal system. A copy of the site evaluation report is enclosed for your information.

Should you desire to file for permission to install a ground absorption sewage disposal system, please submit plot plans for the proposed construction, well, and ground absoprtion sewage disposal system to this office. They will be reviewed and if it is found that there is an adequate area of provisionally suitable soil to accommodate the proposed installation, an Improvements Permit will be issued by this office.

Please be advised that areas of provisionally suitable soil may be reclassified unsuitable and all permits withdrawn by this department should any grading, filling or compaction of the sites intended for the septic tank installation occur.

If I may be of assistance, please feel free to call.

Sincerely,

Bill D. Hardister, Jr.
Environmental Health Supervisor
