MECKLENBURG COUNTY
Health Department

E. Winters Mabry, MD
Director

(704) 432-3199

United Wesleyan Church

2601 Rocky River Rd
Charlotte, NC 28213
App# 6037, File# 7226A, PID# 105-031-31

Currently the septic system for the church is designed for a daily flow of ~~1500~~ 1750 GPD. Based on 2012 water records the church is averaging 148 GPD over the course of one year and with the peak month average of 480 GPD.

Applicant Timothy Hedgepeth is currently operating a private school inside the church. Back in December 2012 the school was approved for 17 students but now Tim is requesting 33 additional students making for a total of 50 students. His school operates Monday –Friday and students bring their own lunch to school. The church operates Wednesday evenings and Sundays.

When we look at the math:
By design 50 students = 500 GPD (10 gal/student)
Church daily average in one year (2012) = 148 GPD
Church daily average peak month (2012) = 480 GPD

(Students) 500 GPD + (Church-yearly average 2012) 148 GPD = 648 GPD
(Students) 500 GPD + (Church-peak month average 2012) 480 GPD = 980 GPD

Based on the evidence and after discussion with my supervisor we are going to approve the additional 33 students. The septic system as designed (1500 GPD) should be able to handle the additional flow.

**It is important to note that any future additions to the church (ie: gym, cafeteria, food service facility, etc.) or additional students to the school may require a septic system alteration or connection to city sewer.

Tyler Ashe, REHS
