LOCATION OF PROPERTY Spring Street off Tilley Morris Road (STREET OR COUNTY ROAD)

SUBDIVISION Belle Meade LOT NO 19 & 20 BLOCK NO.

PLOT PLAN

This is to certify that a soil investigation and onsite investigation was made by the Mecklenburg County Department of Environmental Health on the lot described above. The said investigation was conducted on that portion of the lot as indicated on the above plot. ~~unsuitable~~ provisionally suitable The said lot is approved for the installation of an individual septic tank wastewater treatment system with subsurface, soil absorption effluent discharge subject to the following terms and conditions:

1. A system of a type, size, and location other than that specified may be approved by the Mecklenburg County Department of Environmental Health after additional soil investigation and testing of the wastewater treatment system on the lot.
2. The use of the lot as proposed may require additional soil investigation to be performed by the Mecklenburg County Department of Environmental Health to determine the location of suitable soil as required above and on the application for wastewater treatment system.
3. The approval is valid for a period of one year from the date of the soil investigation, after which time the system installation will require a new soil investigation.
4. This approval is based on the soil investigation performed on the lot which in the opinion of the Mecklenburg County Department of Environmental Health renders the area indicated as acceptable for system installation. Any subsequent alteration of the contour of the lot may require additional soil investigation and approval of the system.

This approval is granted based on the laws of the State of North Carolina and the rules and regulations of the North Carolina Department of Human Resources Division of Health Services and the Mecklenburg County Health Commission which were in effect on the date of issuance and is void if at any time in the future, prior to completion of the system, these laws, rules and regulations are changed such that this approval would not have been granted had the new or revised laws, rules, and regulations been in effect on the issue date.
