Charlotte, NC 28204

Dear Mr. Helms:

At your request a prepreliminary soil survey was made of property located on Cabarrus Road. The purpose of that survey was to determine site suitability for septic tank systems. A soil map was made and a copy is enclosed.

The unshaded area of the map indicate soils that have the required depth, aeration, drainage, percolation and acceptable topography and therefore are predominantly acceptable for septic tank systems. The area shaded yellow indicate soils that are predominantly unacceptable for septic tank systems due to lacking one or more of the above listed requirements.

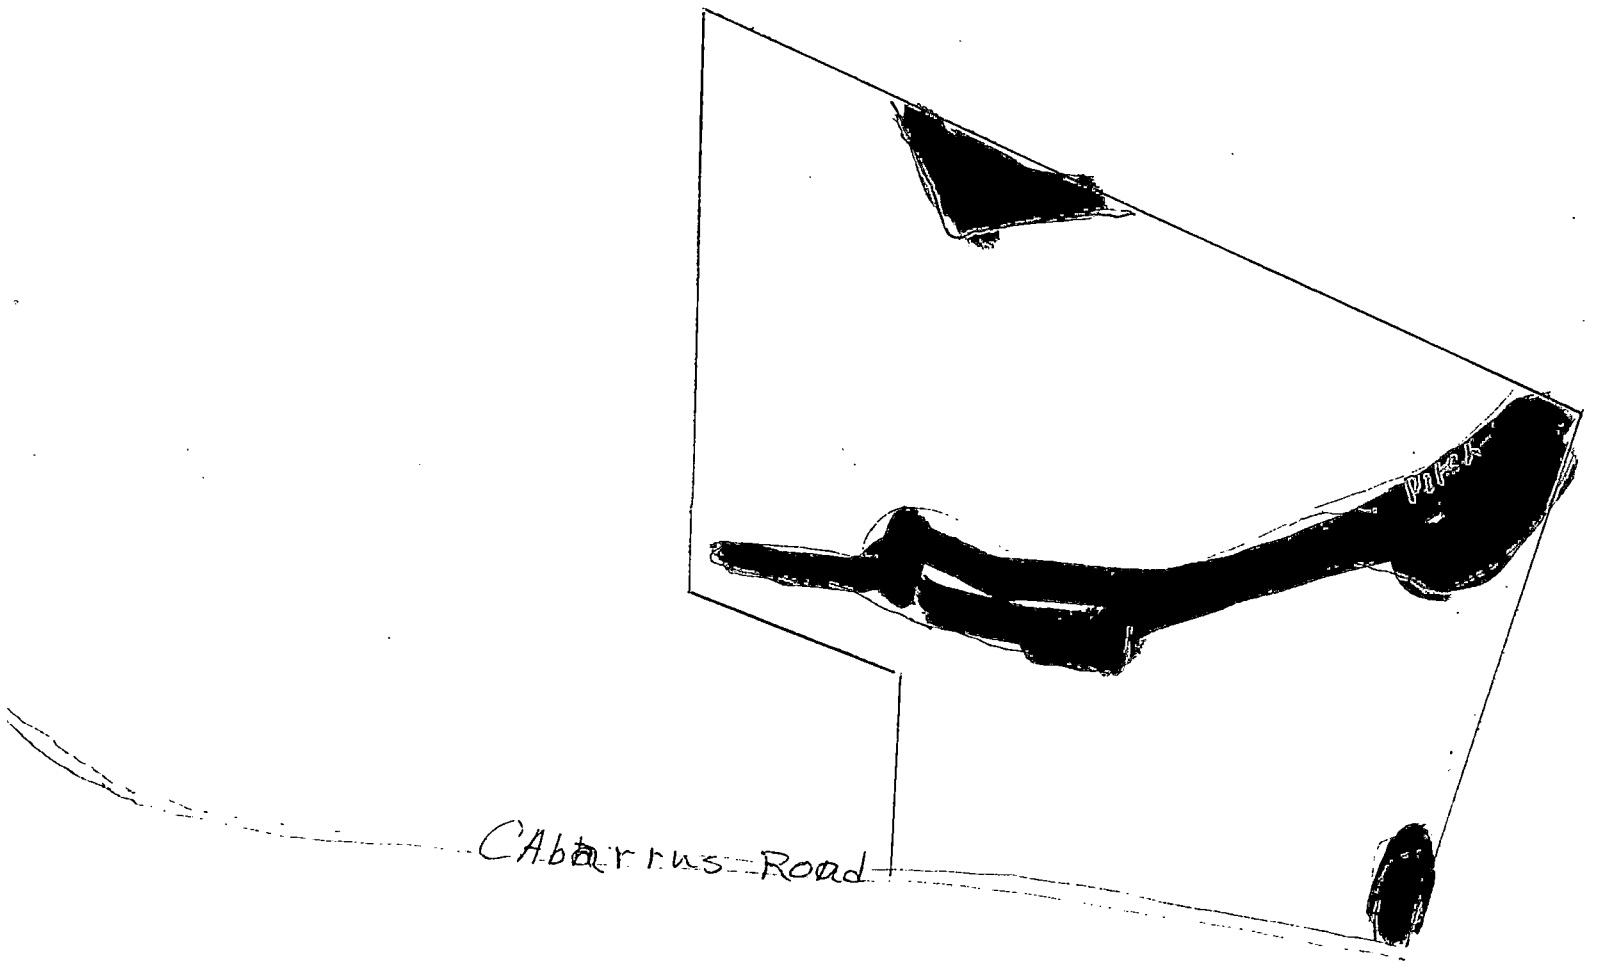

This report is intended for preliminary planning only. Septic tank permits are issued only for marked lots that have been individually tested and found acceptable.

Sincerely,

Willard Ramsey
Soil Scientist
