The property owner will need to complete a Use Existing System application which I have attached. Once completed you will need to submit it back to this inbox and we will reach out via telephone to process a $100 Use Existing System permit fee. Your completed application will be processed in our ground and wastewater permitting system and between 1-2 weeks, you will be contacted by an assigned GWS inspector directly to schedule an on-site inspection.

***The proposed plot plan needs to be completed as this is part of the application process*.**

If the contractor prefers to complete the application and schedule the on-site inspection directly, then they are required to have an owners authorization form completed by the current property owner. I have included that additional attachment IF this is not the current property owner.

Yes, our house is connected to a private septic sewer system.

> We can't locate in our records that the property for this project is connected to private septic sewer system. Can you please confirm if it is or not? The only other option would be city sewer and if that's the case then there's nothing required on our end, and I can release the hold.
