Re: 15205 Albemarle Road
File: 2230B (tax parcel 111-251-22)

Dear Mr. Mishler:

Receipt of your application for an Improvement Permit Alteration for the above property is hereby acknowledged. Upon receipt of the information, a soil and site evaluation was conducted. The plan was then reviewed in conjunction with provisions of 15 NCAC 18A, .2900, "Laws and Rules for Sanitary Sewage Collection, Treatment and Disposal".

The results of the evaluation, a copy of which is attached, indicate that the site is **UNSUITABLE** for installation of a ground absorption sewage system for the following reasons:

.1941 SOIL CHARACTERISTICS (MORPHOLOGY)
(3)(B) Expansive Clay Mineralogy - Soils which have either very firm or extremely firm moist soil consistence, or have either very sticky or very plastic wet soil consistence, are considered to have predominantly 2:1 clay minerals (including mixed mineralogy clays) and shall be considered UNSUITABLE as to clay mineralogy.

.1942 SOIL WETNESS CONDITIONS
(a) Soil wetness conditions as shallow as 6 inches from soil surface

.1943 SOIL DEPTH
(a) Soil depth - saprolite 19" - 32" deep from soil surface.

.1945 AVAILABLE SPACE
(a) Sites shall have sufficient available space to permit the installation and proper functioning of ground absorption sewage treatment and disposal systems, based upon the square footage of nitrification field required for the application rate determined in accordance with these Rules.

(b) Sites shall have sufficient available space for a repair area equal to the area determined in Rule .1945 (a) of this Section.

Due to the limitations on your site, this Department is not aware of any modifications or alternative measures that can be implemented to upgrade the classification from "unsuitable" to "provisionally suitable." Your application for an improvement permit must, therefore, be denied.

OFFICE: (704) 537-1541

You have the right to an informal review of this decision by the environmental health supervisor of this health department and also by the regional staff of the Department of Environment, Health, and Natural Resources. You should contact the health department to arrange for this further review.

You may also wish to obtain the services of a private consultant to collect site-specific data and submit such data and a system design to the health department for technical review. A site may be reclassified to provisionally suitable provided written documentation, including engineering, hydrogeologic, geologic, or soil studies indicates to the local health department that a proposed septic tank system or a proposed alternative system can reasonably be expected to function satisfactorily.

The substantiating data from these studies must indicate that:

A. The effluent (wastewater) will receive adequate treatment;

B. The effluent (wastewater) will not contaminate any ground water or surface water; and

C. The effluent (wastewater) will not be exposed on the ground surface or be discharged to surface waters where it could come into contact with people, animals or vectors.

Finally, you have the right to a formal appeal of this decision if you file a petition for a contested case hearing with the Office of Administrative Hearings, P. O. Drawer 27447, Raleigh, N. C. 27611-7447. A copy of a petition form will be provided to you upon request. The petition must be received by the Office of Administrative Hearings within 60 days after the date of this notice. The hearing will be held in the county in which your property is located.

If you file a petition for a hearing, you must send a copy of the petition to Mr. John C. Hunter, Office of General Counsel, P. O. Box 27687, Raleigh, North Carolina 27611-7687.

Please call 336-5570 or write this office if you have questions or need additional assistance.

Sincerely,

Philo S. Walker R.S.
