Thurman Butler
114 Chelsea Place
Mt. Laurel, New Jersey 08054

Dear Mr. Butler:

At your request a pre-preliminary soil investigation was made on property located on Youngblood Road (parcel 217-085-11). The purpose of the investigation was to determine site suitability for septic tank system. A soil map was made and a copy is enclosed.

The part of the map shaded yellow has soils that have the required depth, percolation, aeration, drainage and suitable topography and are therefore predominantly acceptable for septic tank systems.

The unshaded part of the map indicate soils that do not meet one or more of the listed requirements. The two requirements that this property does not meet is suitable topography and sufficient depth.

Permits are issued for marked lots that have been individually checked and found to meet all the requirements.

Sincerely,

W. B. Ramsey
