Department of Environmental Health

July 15, 1987

Ms. Martha Mullis Wyatt
P.O. Box 23001
Charlotte, NC 28212

Dear Ms. Wyatt:

At your request a pre-preliminary soil survey was made on property located on Happy Hollow Drive. The purpose of the investigation was to determine site suitability for septic tank systems. A soil map was made and a copy is enclosed.

The area of the map that is shaded yellow represents soils that are predominantly acceptable for septic tank systems. The soils in this small area have the required depth, drainage, percolation, aeration and suitable topography. The remainder of the property that is unshaded is predominantly unacceptable for septic tank systems because they do not meet one or more of the above requirements. Permits are issued only after a definite area is marked on the property and that lot has passed an individual soil investigation. This report should be used only for pre-preliminary planning.

Sincerely,

W.B. Ramsey
