SUBJECT: AFT # 6959 (John Woodruff)
Windwood Circle, Lot No. 17
7/25/73

Soils were found to be of the Iredell and Wilkes series. These soils have very plastic and sticky clay subsoils which contain swelling clay minerals. The Iredell soils have a perched high water table during periods of high rainfall. The Wilkes soils are shallow to impervious weathered rock material. These factors result in inadequately slow percolation rate and permeability.

Based on these observations, it is recommended that the lot be disapproved for installation of a septic tank system.
