Dear Mr. Epley:

Subject: Property located at 4403 Kemper Lane
File: 21434

Receipt of the plans and specifications for a modified system of sewage disposal proposed for installation at the above referenced property is hereby acknowledged. Upon receipt of the plan, a review was made of the material on file and the plan was then reviewed in conjunction with provisions of 10 NCAC 10A .1900, "Laws and Rules for Sanitary Sewage Collection, Treatment and Disposal". Our comments are listed below:

1. The site evaluation report classifies the property as unsuitable as to soil depth in test Area I. However, State Sewage Regulations allow for "modified" systems provided certain design stipulations are met. In the "Pacolet" area soil depths range from 30-36 inches with the deeper soil located towards the rear of the property. Your proposal appears to be situated in the deeper soil as indicated on the plot plan; however, the bed system must be replaced with a trench system to be considered for approval. The trenches must remain shallow, not to exceed twenty-four (24) inches. The trenches should not exceed thirty-six (36) inches in width and lines must be nine (9) feet on center. The total system width should be approximately thirty (30) feet. The lot must be able to also accommodate a 100% repair area (1200 square feet of area). The repair area is not indicated on the plan.

2. The well may not be closer than fifty (50) feet from any part of the sewage disposal system or repair area.

For these reasons, the plans as submitted are disapproved. If desired, we will reopen the review upon submission of revised plans.

If you have any questions regarding these matters, please do not hesitate to contact me.

Very truly yours,

Sylvia D. Daniel, R.S.
Environmental Health Supervisor
