SUBJECT: APT #6453 (James Moore)
Lot No. 26, Lands End Road

Soils were found to be of the Mecklenburg and Wilkes series. These soils have very sticky and plastic clay subsoils which contain swelling clay minerals. In addition the Wilkes soils are shallow to impervious weathered rock material. These factors result in inadequately slow percolation rate and permeability.

Based on this investigation, the lot is recommended for disapproval of installation of a conventional septic tank system.
