SUBJECT: Lots 4N, 9N, and 8N, 615 Owen Blvd.
APT#6563 (Hunter)
8-24-73

Soils were found to be of the Wilkes and Iredell series. These soils have very plastic and sticky clay subsoils which contain swelling clay minerals. The Wilkes soils are shallow to impervious rock material. The Iredell soils have a perched high water table during periods of high rainfall. These factors result in inadequately slow percolation rate and permeability.

Based on these observations the lots are unsuitable for installation of a septic tank system.

MAP BOOK NO. PAGE NO.

The above specified lot is approved by the Mecklenburg County Health Department for the installation of an individual septic tank system with subsurface, soil absorption, effluent discharge based on the percolation test results which yielded a percolation rate of [redacted]/inch on an on-site inspection of the said lot, and upon the information supplied in the "Application for an Installation, Construction, Alteration, and/or Repair Permit", number 6563. This approval is subject to the following terms and conditions:

1. That the nitrification field be installed, constructed, altered, and/or repaired in the same area where the percolation test was run

2. That an "Installation, Construction, Alteration, and/or Repair Permit" be issued and in full force and effect when the system is installed, constructed, altred, and/or repaired and that the system be installed in accordance with same

This approval may be revoked and the building inspection department requested to revoke any building permit(s) which have been issued to authorize construction on the said lot if at any time it is determined that any information contained in the "Application for an Installation, Construction, Alteration, and/or Repair Permit" is not correct or is untrue or that the septic tank system is not being installed, constructed, altered and/or repaired in accordance with a valid Installation, Construction, Alteration, and/or Repair Permit
