Ms. Mildred T. Groves
Route 9, Box 183
Charlotte, North Carolina

Dear Ms. Groves:

At your request a pre-preliminary survey was made of soils on property located on Abernathey Road, Tax Code 023-091-03. The purpose of the survey was to determine soil suitability for septic tank systems. A soil map was prepared and a copy is enclosed.

Based on our investigation, the tract appears to be dominantly acceptable for the installation of septic tank systems. Please note that this report does not express or imply individual lot or site approval for the installation of septic tank systems. Individual site or lot approval is dependent on the satisfactory completion of a soils investigation of a particular sit or lot.

Please contact me if there are any questions concerning this report.

Sincerely,

Willard B. Ramsey
Soil Scientist
