STREET OR COUNTY ROAD

SUBDIVISION "The Pines" LOT NO 20 BLOCK NO

PLOT PLAN

This is to certify that percolation test has been run and on-site inspection made by the Mecklenburg County Health Department on the lot described above. The said test was conducted on that portion of the lot as indicated on above plot.

The percolation rate determined by the test was 60*min./inThe said lot is approved for the installation of an individual septic tank wastewater treatment system with subsurface soil absorption effluent discharge subject to the following terms and conditions:

1. A permit to install the specific system shall be obtained from the Mecklenburg County Health Department prior to the beginning of any construction of building and the wastewater treatment system on the said lot.
2. The size of the septic tank wastewater treatment system which may be installed will be determined by the Health Department prior to issuance based on the percolation rate obtained above, and on the size and type of building constructed thereon.
3. This approval is valid only for the system installed in the immediate area where the percolation test was run.
4. This approval may be withdrawn if grading, filling or construction including the drilling of a well is performed on the lot which, in the opinion of the Health Department renders the area where the percolation test was run unsuitable for the installation, construction, operation and/or repair of such a system.

This approval is granted based on the laws of the State of North Carolina and the rules and regulations of the North Carolina State Board of Health and the Mecklenburg County Board of Health which were in effect on the date of issuance and is void if at any time in the future prior to the completion of the system, these laws, rules and regulations are changed such that this approval would not have been granted had the new or revised laws, rules, and regulations been in effect on the issue date.

*Results determined by soil analysis.
