Wallace Lee Paysour
8329 Rego Street
Charlotte, NC 28216

Dear Mr. Paysour:

At your request a prepreliminary soil investigation was made of soils and topography on property located on Beatties Ford Road (tax parcel 037-126-12 and 037-122-13). The purpose of the investigation was to determine site suitability for septic tank systems. A soil map was prepared and a copy is enclosed.

The unshaded part of the map have soils that have the required depth, percolation, drainage, aeration and suitable topography and are therefore predominantly acceptable for septic tank systems.

The part of the map shaded in yellow is a drainage way without a drainage outlet under the road. This area would be acceptable for drain fields if a drainage system was provided for surface water.

Permits for systems are issued for marked lots that have been individually tested and found acceptable.

Sincerely yours,

W. B. Ramsey
