PLOT PLAN

The [illegible] inspected the property and tested the soil in order to report to the Mecklenburg County Health Department the findings of the soil test made. The soil test was conducted in that portion of the lot as indicated in the plot plan.

The percolation rate determined by the test was * 0 min./in. The subject lot is approved for the installation of a ground absorption sewage treatment system with a maximum daily ground absorption effluent discharge as set forth in the following terms and conditions:

1. A permit for the construction of the sewage treatment system shall be obtained from the Mecklenburg County Health Department prior to the application for a building permit for the wastewater treatment system on the said lot.
2. The size of the sewage treatment system which may be installed will be determined by the Health Department based on the percolation rate determined above and on the size and type of building constructed thereon.
3. [illegible]
4. The approval is applicable only to the conditions which existed at the time the percolation test was run. [illegible] portions of the lot which may be suitable for the installation of a sewage treatment system.

This permit is granted pursuant to the laws of the State of North Carolina and the rules and regulations of the North Carolina Board of Health and of the Mecklenburg County Board of Health which were in effect on the date of issuance and is void at any time in the future prior to the completion of the system, those laws, rules, and regulations are changed such that this approval would not have been granted had the new or revised laws, rules, and regulations been in effect on the issue date.

*Results determined by soil analysis
