INTER-OFFICE COMMUNICATION

DATE: February 24, 1975

TO: John R. Adkisson

FROM: W. Everette Lynn, Jr. WEL
Soil Scientist

SUBJECT: APt. 6730 (Civil Realty, Inc.)
Lot No. 19-A, Pine Circle & Hickory Dr.
Date: 2/21/75

The lot consists of soils of the Wilkes series. These soils have plastic and sticky clay subsoils which contain a high proportion of expanding clay minerals. They are also extremely shallow (1 to 2 feet from soil surface) to massive weathered rock material. These soil characteristics result in inadequately slow permeability and percolation rate (true mean perc. rate in excess of 200 min./in). Due to shallow soil depth, potential also exists for contamination of the water table.

Based on this investigation, the lot is not recommended for installation of a septic tank system.
